

Artist

The Conceptual Framework

Create a mind map based on the four agencies of the Conceptual Framework - this is a tool we use in the study of Visual Arts.

Look for interaction and connection between these agencies.

Artwork

The **artist** is an identity who creates an expression of their ideas, emotions, beliefs and values. These concepts expressed by the artist are **influenced** by their **time and place**.

Audience

An **artwork** **documents** and **records** an artist's **expressions** along with aspects of **history**, **culture** and **influences** on the **world** and **society**.

World

The **audience** is anyone who views the artwork. This includes **historians**, **critics**, **members of the public (world)** **YOU** and the **artist**. The audience provides a response and interpretation of the artwork and the **artists practice**.

The **world** provides influences that inspire the artist to create and the audience to interpret. The world provides a **context** and a reference for **time and place**.
